PROFESSIONAL SUMMARY

Aspiring **Data Analyst** and **Artificial Intelligence** undergraduate pursuing a Bachelor of Technology in Artificial Intelligence and Data Science, with **hands-on experience** in Python, SQL, Power BI, Excel, Streamlit, Machine Learning, Dashboard Development, KPI Reporting, and Business Intelligence. Experienced in developing AI-powered applications, interactive dashboards, and analyzing **2,500+ records** to deliver business insights and support data-driven decision-making.

EDUCATION

Apollo Engineering College (Pursuing) 2024 – 2028
Bachelor of Technology (B.Tech.) in Artificial Intelligence and Data Science

TECHNICAL SKILLS

Programming Languages: Python, SQL

Data Analytics & Business Intelligence: Data Analysis, Exploratory Data Analysis (EDA), Data Preprocessing, Dashboard Development, Data Cleaning, Data Visualization, KPI Reporting, Business Intelligence, Excel Automation, SQL Automation

Tools & Technologies: Power BI, Power BI Service, Microsoft Excel, Tableau, MySQL, Git, GitHub, VS Code, Jupyter Notebook, JSON, Kaggle, Looker Studio

Libraries: Pandas, NumPy, Matplotlib, Scikit-learn

Machine Learning: Random Forest, Linear Regression, Classification, Feature Engineering, Sales Forecasting

AI Technologies: Streamlit, Gemini API

PROFESSIONAL EXPERIENCE

Data Analyst Intern | Tamil Nadu Model Schools, Government of Tamil Nadu June 2026 – July 2026

- Cleaned, checked, and formatted institutional Excel datasets exceeding **2,500 records**, applying conditional formatting and generating heatmaps that made trends easier to spot for stakeholders.
- Prepared **70+ reports** over 7 weeks through twice-daily (morning & evening) student progress reporting and compiled a comprehensive LMS portal report, improving reporting consistency and turnaround time.
- Simplified Excel-to-JSON data conversion for **2,345 records** by building and testing Python and Pandas scripts, cutting manual data-entry effort.
- Developed **3 interactive Power BI dashboards** (CCAA Task Manager, Alumni MSMS Old Receipt, and Ticket Report) with slicers and filters, refining them based on stakeholder feedback to speed up reporting.
- Explored Power Query, Power BI Service, Jupyter Notebook, and Streamlit over **5–6 hours** of hands-on practice to build a prototype self-updating web dashboard and the self-initiated "Sandhiya AI" application, strengthening end-to-end automation skills.

PROJECTS

Retail Sales Analysis

Python, SQL, Power BI, Scikit-learn | GitHub

- Cleaned and analyzed a Superstore retail dataset (**5,009 orders, \$2.30M sales, 793 customers**) using Python and **30+ SQL queries** to uncover sales, profit, and regional performance trends.
- Built **4 interactive Power BI dashboards** covering KPIs, profit analysis, customer segmentation, and drill-through business insights, making performance trends easy to explore.
- Developed Machine Learning models for sales forecasting (Linear Regression) and profit/loss classification (Random Forest, **94.4% accuracy**), driving data-backed inventory and discount recommendations.

Sandhiya AI | AI-Powered Intelligent Assistant

Python, Streamlit, Gemini API | GitHub | Live Demo

- Built an AI-powered intelligent assistant supporting **5 document formats** including CSV, Excel, PDF, DOCX, and TXT, reducing manual document review time.
- Integrated secure authentication, validated web search, interview question generation, downloadable chat history, and document intelligence to broaden the assistant's usability.
- Engineered a scalable conversational AI platform for intelligent document analysis and real-time assistance, enabling faster, self-serve answers to document queries.

Sales Analytics Dashboard with Future Sales Prediction

Python, Streamlit, Scikit-learn | GitHub | Live Demo

- Assembled an interactive Sales Analytics Dashboard to analyze sales performance, customer behavior, and regional trends, enabling faster, data-driven decisions.
- Structured KPI dashboards with sales, profit, customer, and monthly performance insights using interactive visualizations, improving visibility into business performance.
- Trained a Machine Learning model using Scikit-learn to predict future sales trends, supporting more accurate demand planning.

Employee Management Dashboard (SQL Automation)

SQL, Power BI, MySQL | GitHub

- Delivered an Employee Management Dashboard by integrating SQL and Power BI, giving HR faster visibility into workforce analytics.
- Generated interactive dashboards to monitor employee performance, department-wise insights, attendance, and organizational KPIs, streamlining performance reviews.
- Streamlined SQL data retrieval and Power BI reporting, improving reporting efficiency and data accuracy, and confirmed reliability by adding new source files to the data folder and checking that the dashboard refreshed automatically.

Ticket Analysis Dashboard (Excel Automation)

Excel, Power BI, Power Query | GitHub

- Produced a Ticket Analysis Dashboard using Microsoft Excel and Power BI, giving the team faster visibility into ticket status, priorities, and operational performance.
- Streamlined data cleaning and reporting workflows using Power Query, cutting manual report generation time, and confirmed reliability by dropping new source files into the folder and checking that the dashboard updated without manual intervention.
- Delivered interactive dashboards that transformed raw ticket data into actionable business insights for faster decision-making.

CERTIFICATIONS

- Data Analysis with Python – IBM Developer Skills Network
- SQL and Relational Databases 101 – IBM Developer Skills Network
- Data Analytics Essentials – Cisco Networking Academy
- Digital Skills – Microsoft & Naan Mudhalvan
- Data Analyst Internship Certificate – Tamil Nadu Model Schools, Government of Tamil Nadu

LANGUAGES

Tamil – Fluent

English – Professional Working Proficiency
